Professional Price List 2009

ParaMount - Mount Board Products; Pressure Sensitive Mount Board, Heat Activated Mount Board, Bevel Edge Mount Board, Hard Board Mount Board, and Dry Mount Board are manufactured with quality materials; and, at a neutral pH do not contain any chemicals that will interact with or damage photographic emulsions. *ParaMount - Mount Board* products are extremely smooth, virtually eliminating "orange peel" normally associated with poor quality substrates such as chipboard and some foam products. The quality materials and manufacturing process ensure that *ParaMount - Mount Board Products* will lay flat and will not warp or wrinkle.

ParaMount - Mount Board Products, are normally shipped the same day/next day depending on the size of the order.

Great care is given to the packaging of *ParaMount - Mount Board Products*. Each package of *ParaMount - Mount Board* is wrapped in poly coated paper to ensure that it remains clean and dry during shipping and storage. *ParaMount* is uniquely packaged in double wall corrugated containers with "crushable" panels of EPS (expanded polystyrene) to protect the product from damage during shipping. Sizes up to 20 x 24 can be shipped with confidence via a small package carrier.

In addition, CPPI is a distributor for *Ultra - Foam Core Mounting Board* and *Hi-Impact Styrene* in a variety of coatings and densities. Please refer to Price List to select the foam core product which best meets your needs.

Please take a moment to read our product descriptions, technical information and review our pricing and you too will agree that *ParaMount - Mount Board Products* are simply the best product, best value on the market today.

ParaMount - Pressure Sensitive Mount Board

ParaMount - Pressure Sensitive Mount Board is the perfect product for cold mounting photographic prints and artwork.

The combination of an extremely smooth SBS mount board, acrylic pressure sensitive adhesive, with just the right amount of tack and a heavy, easy to remove release paper makes ParaMount - Pressure Sensitive Mount Board superior to other "peel n' stick" products.

Mounting is simple and easy, peel back the release paper about an inch, align the print with the edge of the mount board and slowly peel back the rest of the release paper while smoothing the entire surface to avoid trapping any bubbles.

ParaMount - Pressure Sensitive Mount Board is not a repositionable product.

ParaMount - Heat Activated Mount Board

ParaMount - Heat Activated Mount Board makes mounting your prints simple and easy. With the heat activated adhesive already on the mount board - no tissue is required! In addition, the time required in the heat press is significantly shorter than tissue systems. The "hot melt" is heat activated at 200 - 210 degrees and; depending, on the size of the print and type of heat press, a dwell time of only 30 - 45 seconds is required to adhere a photographic print.

Trimming and additional handling are a thing of the past. ParaMount - Heat Activated Mount Board saves you time and money.

Bevel Board may be purchased with a bevel and without a painted edge.

Bevel Edge Mount Board- 1/8" Tempered Hardboard

This is the same presentation that has always been available with CPPI's exclusive Beveled Edge Mount Board; the same bevel, same metallic colors and the same high-standard of quality. The difference, is the 1/8" Bevel Edge Mount Board offered here, is manufactured from 1/8" tempered hardboard that is smooth on both sides. The back of the Bevel Edge Mount Board has a black paper backing for a totally finished look.

Bevel Edge Mount Board is extremely durable and warp resistant.

Bevel Edge Mount Board is available in Metallic Gold, Metallic Silver and Black Lacquer.

Bevel Edge Mount Board- 1/8" Tempered Hardboard

Bevel Edge Mount Board-DX can be used with tissue adhesive, spray adhesives and pressure sensitive sheet adhesives. CPPI also provides a pre-cut, pre-sized mount board with pressure sensitive adhesive on both sides to make mounting simple and quick. (see Price List below)

The metallic paint on the beveled edge is overlapped onto the mounting area to ease print alignment.

(*) mount board is pre-sized to fit inside the bevel area without trimming the mount board. These boards are 3/8" undersized.

Combine all units purchased (all sizes/all weights) to determine price break quantity.

Call for pricing on special sizes.

Bevel Board may be purchased with a bevel and without a painted edge.

ParaMount - Hardboard

ParaMount - Hardboard Mount Board is manufactured using premium, 1/8" Hardboard, tempered for durability, and smooth on both sides.

To ensure the cleanest and smoothest mounting surface available we add a layer of our quality .024 (single weight) SBS mounting surface in either pressure sensitive, heat activated or plain, uncoated dry mount. This is the same quality ParaMount Mount Board that our customers routinely use.

Wall and Gallery Display Mounts

Ultra Board with Edge Banding Available in White or Black

Ultra Board with Edge Banding is manufactured using a lightweight structural panel consisting of rigid polystyrene foam faced on both front and back by a smooth, moisture resistant sheet of solid hi-impact polystyrene.

The edges are banded with matching Black or White Styrene for a finished look.

Ultra Board with Edge Banding is faced with a pressure sensitive surface of white-backed hi-tack adhesive for dependability and ease of mounting.

Shadow Mounts Straight Edge or Beveled Edge

Shadow Mounts are manufactured using a lightweight structural panel consisting of rigid polystyrene foam faced on both front and back by a smooth, moisture resistant sheet of solid hi-impact polystyrene. The edges of the Shadow Mount can be manufactured as either a straight edge (90 degrees) or as a back-beveled edge at 45 degrees that appears to "float" the image away from the wall.

Shadow Mounts are faced with a pressure sensitive surface of white-backed hi-tack adhesive for depending ease of mounting.

ULTRA - Foam Core & Hi-Impact Styrene Mount Board Products
2009 Product Description And Price List

CPPI is a distributor for ULTRA - Foam Core Mounting Board Products. The unusually smooth surface and rigid polystyrene core make ULTRA - Foam Mounting Board Products perfect for mounting and laminating. ULTRA - Foam Core Mounting Boards are available in a variety of different versions to give you an individual preference for your specific needs. Please see the descriptions and specifications listed below and select the right product for your needs: UltraCore, UltraMount, or Styrene Mount Board.

Ultra Peel N' Stick is a lightweight, warp resistant, rigid foam centered panel with a high-tack pressure sensitive adhesive applied to one side. Peel off the protective liner and press down for a permanent mount. Ultra Peel N' Stick is an excellent choice for mounting photographs, papers, posters, drawings, graphs, charts, digital prints, and virtually any type of paper or plastic.

Ultra Plain/Uncoated Mount Board is available for use with tissue, spray adhesives, pressure sensitive roll adhesives and most adhesive and laminating products.

ULTRA MOUNT - 3/16" Heavy Duty / High Density Foam Board

This heavy duty, rigid foam centered board consists of a dense polystyrene core faced on both sides by a smooth poly coated kraft paper. ULTRA Mount is available as Peel N' Stick, Heat N' Stick and Plain/ Uncoated Mount Board.

Peel N' Stick and Plain/Uncoated Mount Board are available in both white and black.

ULTRA CORE - 3/16" Standard Density Foam Board

This standard density foam centered board consists of a polystyrene core faced on both sides by a smooth 12 pt. clay coated kraft paper. ULTRA CORE is available as both a Peel N' Stick and Plain/Uncoated Mount Board . Plain Uncoated Foam Board is available in white only.

ULTRA - Hi-Impact Styrene Mount Board

Hi Impact Styrene is an excellent choice for thin frame mounting applications requiring rigidity and super smooth mounting substrates. It consists of solid .040 or .080 thick white styrene sheet coated on one side with a high tack pressure sensitive adhesive. It is available in sizes ranging from 5x7 to 30x40. Available in both white and black..

ULTRA BOARD - 3/16" Heavy Duty/High Density Foam Board

This heavy duty, rigid foam centered board consists of a dense polystyrene core faced on both sides by smooth .030 HI-Impact Styrene. ULTRA Board is coated on one side with high tack pressure sensitive adhesive. It is available in most popular photographic sizes. Ultra Board is available in black only.

*Ultra Mount, Ultra Core and .040 Styrene are shipped FOB, Bentonville, AR
.080 styrene is shipped FOB, El Paso, TX*

*Ultra - Foam Core Products are shipped FOB, Bentonville, AR.
.080 Styrene is shipped FOB, Canutillo, TX
.040 Styrene and .030 Styrene UltraBoard are shipped FOB, Bentonville, AR*

How To Instructions

ParaMount - Heat Activated Mount Board

This is a "no tissue" mounting board product.

1. Set press to 200 - 210 degrees and preheat.
2. Position print on adhesive side of ParaMount - Heat Activated Mount Board. ParaMount is packed with the adhesive side up. The adhesive surface is very smooth and has an opaque appearance.
3. Tack corners with tacking iron.
4. Place in heat press - heat side up and cover print with release paper.
5. Close press for 30 to 45 seconds to activate the adhesive on the mount board. Trial and error will determine the proper dwell time for your press.
6. Open press and allow the print to cool on a flat surface - bonding is complete.
7. Trim edges of print if necessary.

For commercial vacuum presses: Lower the temperature to 180 - 200 degrees and set 30 - 45 second dwell time to include the additional time required by your press to complete it's vacuum cycle.

ParaMount - Pressure Sensitive Mount Board

For Cold Mounting Photos, Artwork and Graphics

1. Peel back protective release paper about 1" from across the top of the mounting board
2. Align edge of print with mounting board.
3. Slowly peel back the rest of the release paper while firmly pressing down, while smoothing the entire surface to avoid trapping any air bubbles.
4. Trim edges of print if necessary.

ParaMount - Gold Bevel Dry Mount Board

ParaMount - Gold Bevel Board can be used with tissue adhesive, spray adhesives and pressure sensitive sheet adhesives. the gold paint on the beveled edge will not flake off and is overlapped onto the mounting area to ease print alignment.

1. If you are using heat activated mounting tissue or pressure sensitive sheet adhesive affix the mounting medium to the print. If you are using spray adhesive go to Step 2.
2. Trim photographic print to fit inside the beveled area of the mount board.
Gold Bevel Board is offered in standard photographic sizes (outside dimensions) with a slightly smaller mounting area created by the 40° bevel. A standard photographic print must be trimmed by approximately 1/8" on all four sides.
3. Affix the print to the gold bevel board following the manufacturers instruction for use.

Technical Information

Hot Melt Adhesive - The "heat activated" hot melt which provides the adhesive for mounting the photograph is applied to 24 pt. SBS at our supplier's facility, which specializes in coating applications. In addition to specializing in coatings, the latest technology is utilized to deliver a consistent, smooth and flat product. The hot melt has a pH of 6.0 - 6.5 and will not interact chemically with photographic emulsions. The hot melt is "heat activated at 200° - 210° and, depending on the size of the print and type of heat press, a dwell time of only 30 - 45 seconds is required to adhere a photographic print.

Pressure Sensitive Adhesive - The "pressure sensitive" adhesive which provides the adhesive for mounting the photograph is applied to 24 pt. SBS at our supplier's facility, which specializes in coating and laminating applications. To ensure ease of use, *ParaMount - Pressure Sensitive Mount Board* is supplied with a *heavy duty* 5 mil release paper and a *high tack* acrylic adhesive to achieve a quick and permanent bond. The acrylic "pressure sensitive" adhesive is specially formulated for the photographic industry and will not interact with photographic emulsions or digital prints.

24 pt. SBS - Backing Board - SBS (solid bleached sulfate) is an extremely stable substrate used throughout the printing and folding carton industries because of its unique properties. SBS is virgin board utilizing bleached fibers from both softwood and hardwood trees, with about 80% coming from hardwood trees. When formed into a sheet utilizing Fourdrinier forming technology and matted into paperboard; these hardwood fibers form a smooth white sheet, ideal for high-tech packaging. SBS has an almost neutral pH value of 5.5 - 6.0.

Laminating Adhesive - The adhesive used to "buildup" the plies of *ParaMount* from Single Weight to another ply thickness; is a vegetable based, food grade adhesive product, that is extremely environmentally friendly. This product does not qualify as Hazardous Waste as determined by the United States Environmental Protection Agency.

Bevel and Paint - *ParaMount Gold Bevel Board* is five (5) plies thick (129 pt.) and beveled at a 40° bevel to increase the amount of the gold edge that will show and enhance the appearance of your presentation. The bevel and a small overlap on the face of the mount board are sprayed with a non-flaking metallic paint.

Packaging - *ParaMount - Mount Board Products* are shipped in pre-packaged quantities depending on the weight of the mount board, please refer to the price list for quantities per carton. Each package of mount board is wrapped in poly coated paper to ensure that it remains clean and dry during shipment and storage. *ParaMount* products are shipped in "damage resistant" double wall corrugated cartons with "crushable" panels of expanded polystyrene to protect the product from damage during shipment and storage.

Terms and Conditions

Credit - Establishing with CPPI is easy, just supply three (3) credit references.

Please request a credit application and return the completed form. Credit approval usually takes about 10 days.

Open Account Payment Terms - Net 20 days.

Past Due Accounts - A 1 1/2 % per month service charge will be added to balances over 30 days old.

C.O.D. - CPPI will gladly accept COD orders. COD fees will be added to product and freight charges.

Credit Cards - CPPI accepts Visa, MasterCard, and Discover Card.

Freight - All *ParaMount* shipments are F.O.B. El Paso, TX.

All UltraFoam and Hi-Impact Styrene orders are shipped F.O.B. Bentonville, AR.

Please Note: Mount Board Products are sold only in full box quantities. Please call for pricing on sizes and weights not listed. Samples are available at NO CHARGE.
